

KLIPPAN SAFETY POLAND

INDUSTRIAL CONSTRUCTION

EXTENSION AND REFURBISHMENT OF THE KLIPPAN SAFETY POLAND PLANT IN STARGARD SZCZECIŃSKI

As part of the investment, the Klippan Safety Poland plant, dealing with production of textiles, safety belts and truck equipment, was extended and refurbished. The construction and refurbishment works were scheduled in such a way so as not to interfere with ongoing production processes. The plant's surface area was extended by 1,740m². Interiors of the existing offices, corridors and canteens were also modernized. Comprehensive utilities installation was executed, including heating, ventilation and compressed air systems. The area around the site was developed as well, including construction of roads and squares of a total surface area of 2,700m².
